Card Revenue Growth vs. Issuer Peers

2013-2015 % CAGR

4.9% 3.1% 1.9% (0.3%) (2.5%) (3.3%)

Revenue net of rewards

US Consumer DFS COF US JPM C NA - Branded BAC

Note: Total company results for Discover and Card Segment results for other issuing competitors; Consumer Lending segment for BAC, U.S. business for COF and North America branded business for Citi. Issuing competitors reflect rewards costs as a contra revenue item whereas the majority of AXP rewards costs are reported as expenses. BAC CAGR was calculated using reported growth rates for the Consumer Lending segment in 2014 and 2015 due to a reclassification of Consumer Real Estate Services.

### Spend (US)

- **On-Us (AXP Card Member)**: ~45%
- **Off-Us (AXP Card Member)**: ~55%
- **Non-AXP**: 33%

~67%

Data as of Dec’15. AXP Card Members reflects all active US Consumer proprietary accounts as of Dec’15, excluding Costco cobrand accounts. Off-Us Spend, Credit Card Spend and Credit Card Loans is calculated from internal estimates of the size of wallet capability of AXP Card Members. Non-AXP Spend and Loans is an internal estimate based on prospects with certain criteria and credit bureau data. *Annual Income based on all Card Member self reported income throughout 2015.
### Wallet Share is High, But Losing Ground

Benchmark***

- Industry Benchmark: JPM, COF, C, DFS card segment reporting.

*Adjusted US Consumer loan growth is a non-GAAP measure and excludes balances related to cobrand partnership with Costco in the U.S. now classified as a held for sale. See Annex C for a reconciliation of loan growth on a GAAP basis. **Reflects revenue net of rewards and excludes revenues net of rewards derived from Costco cobrand accounts and spending on other (non-Costco cobrand) American Express cards at Costco warehouses. Other revenue is reflected net of rewards expense. ***Industry Benchmark: JPM, COF, C, DFS card segment reporting.
There is Significant Opportunity Within Our Card Member Base

![Pie Chart]

- **71%**: Non-AXP
- **29%**: Off-Us (AXP Card Member)
- **25%**: On-Us (AXP Card Member)

Data as of December 2015. AXP Card Members reflects all active US Consumer proprietary accounts as of December 2015, excluding Costco cobrand accounts. Off-Us Loans is calculated from internal estimates of the size of wallet capability of AXP Card Members. Non-AXP Loans is an internal estimate based on prospects with certain criteria and credit bureau data.
Growth is Balanced & High Quality

US Consumer Contribution to 2015 Loan Growth

- **Tenured Lending Card Members**
  - 50% Lower Delinquency*
  - Lower Marketing Cost
  - Higher 12-Month Revenue

- **New Lending Card Members**
  - ~$8.9K Average Spend**
  - 754 Average FICO
  - 60% AXP Branded

---

Tenured defined as U.S. Card Members acquired prior to 2015. *Delinquency of Tenured Card Members with line increases vs. new lending accounts. **Average billed business acquired reflects the first 12 months of spending by a new Card Member. For Card Members acquired less than 12 months prior, internal estimates have been used for their expected spending over the 12 month period (e.g. a new Card Member acquired 8/1/15 includes five months of actual spend and seven months of forecasted spend).

Steve Squeri
Vice Chairman
Executive Summary

- Our new Global Commercial Services segment is a significant contributor to AXP
- There is tremendous opportunity in the fast growing and under-penetrated small and mid-size business segment to grow spend
- We are well-positioned in the B2B segment
  - Scale player
  - Diverse product suite
  - Spending capacity
  - World-class brand and service
- We will leverage combined strengths of our newly integrated commercial business to help accelerate this growth

Growth Strategy

**Our heritage & foundation**
- Maintain leadership position
- Scale and relevance
- Focus on marquee signings
- Diversify spend mix

**Our growth engine**
- Address the cash flow needs of the small and middle market customer through our diverse suite of products
Small Business & Middle Market Leadership & Opportunity

**Est. Small Business Spend***
Estimated U.S. total small business (ex-payroll) in 2014 on commercial cards

**Credit and Charge**

**All other forms of payment**

*Nilson Report for non-AXP purchase volume in 2014; AXP based on internal data. **BCG Payments Model and BCG analysis; AXP based on internal data; Other issuer share based on Nilson Report. ***Estimated total small business spend is U.S. small businesses with less than $10MM in revenue based on the McKinsey Payments Map (March 2015). The McKinsey Payments Map reports on the following payment methods for small businesses: cash, small business credit card, debit, wire, ACH, and check and it does not include spend on consumer cards by owners/employees of small businesses. Small business plastic spend includes small business credit card and debit spend. Small business non-plastic spend includes all non-payroll small business expenditures not included in small business credit card or debit. Source: McKinsey

Opportunity

- Extend best practices and capabilities from the U.S. to international
- Unified sales and relationship management strategies across Middle Market and Small Business Services in each country

See glossary for explanations of FX-adjusted information.
Summary

- Our new commercial segment is a significant contributor to AXP

- We are well-positioned in the fastest-growing and most under-penetrated segment of payments globally
  - Scale player in B2B
  - Diverse product suite
  - World class brand and service
  - Spending capacity

- As a result of combining our commercial businesses, we can help accelerate growth in the small and mid-size segment
Key Priorities

- Leverage our distribution channels
- Deepen relationship management
- Innovate with products
- Accelerate our progress in International

* Adjusted billed business is adjusted for FX (see Glossary for an explanation of FX-adjusted information); adjusted worldwide Card Member loans, a non-GAAP measure, is adjusted for FX and includes in Q4’15 Card Member loan balances related to cobrand partnerships with Costco in the U.S. and JetBlue, now classified as held for sale (see Annex G for a reconciliation); total revenues net of interest expense, adjusted for FX and excluding Business Travel revenues from H1’14 and the gain on the Q4’14 sale of the Concur investment is a non-GAAP measure (see Annex G for a reconciliation); adjusted total revenues net of interest expense, a non-GAAP measure, excludes restructuring charges in Q2’14 and Q4’14, H1’14 Business Travel operating expenses, Q2’14 Business Travel JV gain and transaction-related costs, Q2’14 AXP Foundation contribution and Q4’15 Enterprise Growth charge from total operating expenses (see Annex F for a reconciliation); adjusted Diluted EPS, a non-GAAP measure, exclude the Q4’15 Enterprise Growth charges (see Annex E for a reconciliation).
2016/2017 External Environment and Outlook

- Build projections based on economic consensus
  - U.S. and Global GDP growth in 2016 and 2017 expected to remain below historical average*
  - Forward curve anticipates 50 bps increase in interest rates by end of 2017
  - Unemployment rate continues gradual improvement through 2017*
  - Exchange rates remain at current levels
- Assume no further changes in regulatory environment

*GDP consensus per Blue Chip for the U.S. and IMF for International; Unemployment estimates per U.S. Bureau of Economic Analysis.
EPS Growth Outlook – Q4’15 Earnings Call

2016

$5.40-$5.70

Forward-Looking Statements
- Expect modest uptick in billings growth rates beginning in the first quarter
- Tax rate between 34% and 35%

2017

≥$5.60

Forward-Looking Statements
- Operating expenses targeted to be at least 3% lower than the 2015 adjusted base of $11.3B*

2016 and 2017

Forward-Looking Statements
- Loan growth to contribute to increased provision
- Expect to see upward pressure on write-off rates, due primarily to the seasoning of loans
- Excludes impact of any restructuring charges and other contingencies

* Adjusted Operating Expenses, a non-GAAP measure, excludes the Q4’15 Enterprise Growth charge ($419MM) from Total Operating Expenses of $11.8B
Expect 2016 results to be uneven by quarter

Outlook Commentary

- CCAR Submission in early April
- Costco portfolio sale in June
- Regulatory environment

Tier 1 Common is Tier 1 Common under Basel I for 2013 and Common Equity Tier 1 under Basel III, inclusive of transition provisions, for 2014 and 2015. The 2013 Tier 1 Common Risk-Based Capital Ratio is calculated as Tier 1 Common Equity, a non-GAAP measure, divided by Risk-Weighted Assets. See Annex I for a reconciliation between Tier 1 Common Equity and Total Shareholders’ Equity.

Payments industry in the midst of significant change

Provided specific EPS targets for next two years

Focused on execution across 2016 and 2017

EPS Growth scenarios frame earnings potential

Environment could drive results higher or lower
Q1'16 Outlook

- Volume and revenue trends
  - Sequential change vs. Q4'15
  - FX and other macro impacts
  - Cobrand
  - Discount Rate

- Other notable items
  - Investment Spending
  - JetBlue Portfolio Sale Gain
  - Restructuring
Key Priorities

- Accelerate Revenue Growth
- Optimize Investments
- Reset the Cost Base
Appendix
**Glossary (1 of 2)**

- **Active Cards**: Consumers who collected and/or redeemed points at a Loyalty Coalition participating merchant during the calendar year presented.

- **Active Locations in Force (Active LIF)**: Reflects merchant locations with at least one American Express card transaction over the past 12 months.

- **Billed Business Acquired (Spend from New Customers)**: Reflects the first 12 months of spending for a new customer acquired. For customers acquired less than 12 months prior, internal estimates have been used for their expected spending over the 12 month period.

- **Card Billed Business**: Includes activities (including cash advances) related to proprietary cards, cards issued under network partnership agreements (non-proprietary billed business), corporate payment services and certain insurance fees charged on proprietary cards. In-store spending activity within retail co-brand portfolios in GNS, from which we earn no revenue, is not included in non-proprietary billed business. Card billed business is included in the United States or outside the United States based on where the issuer is located.

- **Average Discount Rate**: This calculation is generally designed to reflect pricing at merchants accepting general purpose American Express cards. It represents the percentage of billed business (generated from both proprietary and GNS Card Member spending) retained by us from merchants we acquire, or for merchants acquired by a third party on our behalf, net of amounts retained by such third party.

- **FTE**: Full-time equivalent

- **FX Adjusted Information**: Assumes a constant exchange rate between the periods being compared for purposes of currency translation into U.S. dollars (i.e., assumes 2015 foreign exchange rates apply to 2014 results). Certain amounts included in the calculations of FX-adjusted revenues and expenses, which constitute non-GAAP measures, are subject to management allocations.

- **Global Services Group Operating Expenses**: Represents direct operating expenses associated with all non-development technology operations, customer service, credit and collections, global security, and other support functions such as procurement and real estate.

- **Net Promoter Score (NPS)**: The Net Promoter Score (NPS) measures the level of customer advocacy for AXP acceptance. The metric is calculated from ratings given by customers in response to a question that asks the customer if they were having a conversation with a peer regarding the cards they accept, how likely would they be to recommend to accept American Express, using a 1-10 scale where “1” means “Not at all Likely” and “10” means “Extremely Likely.” customers who respond with a rating of 9 or 10 are “Promoters” while customers who respond with a rating between 1 and 6 are “Detractors.” The Net Promoter Score is calculated by subtracting the percentage of Detractors from the percentage of Promoters. The survey, conducted annually, is done via email and phone and administered by an independent research company on behalf of American Express.
Glossary (2 of 2)

- **Operating Expenses**: Represents salaries and employee benefits, professional services, occupancy and equipment, communications, and other, net.

- **Payout Ratio**: Calculated by dividing the total amount returned to shareholders through dividends and share repurchases during the respective period by the total capital generated through net income attributable to common shareholders and employee plans during the respective period.

- **ROCE**: Return on average common equity, which is calculated by dividing one year period net income attributable to common shareholders by one year average common shareholders’ equity.

- **Global Recommend to a Friend (RTF)**: Measures a Card Member’s satisfaction with the level of servicing provided by American Express customer care professionals. The metric is calculated from ratings given by Card Members in response to the question: “Based on this recent service experience, how likely are you to recommend American Express to a friend or colleague? Please use a 1 to 10 scale where ‘10’ means ‘extremely likely’ and ‘1’ means ‘extremely unlikely.’” Card Members who respond with a rating of 9 or 10 are “Promoters” while Card Members who respond with a rating between 1 and 6 are “Detractors.” RTF is the difference between the percentage of Card Members who are “Promoters” vs. “Detractors.” Survey is conducted via email and administered by an independent research company on behalf of American Express. Responses across three channels (Telephone Servicing Center, Membership Rewards and Disputes) are gathered, and represents approx. 500K surveys in a 12 month period.

- **S&B**: Salaries and benefits.

- **Technology Development Expense**: Includes the cost of delivering new capabilities and platforms, and modernizing existing ones.

(1) Fee Revenue reflects Card Fees and Other Revenues excluding Conversion revenue, which is considered "spend" revenue, less Cost of Card Member Services and Other Expense.
(2) Lend Revenue reflects adjusted Net Interest Income, less Card Member Loans and Other Provision for Losses and Lending Cost of Funds.
(3) Spend Revenue reflects Discount Revenue, Conversion Revenue (reported within Other fees & commissions on the income statement), less Card Member Rewards expense, Charge Provision, Charge Interest expense and other adjustments.

*See Glossary for a definition of Operating Expenses*

*Reflects face amount of card ABS, net of securities retained by the Company. **Short-term Debt includes commercial paper and other short-term borrowings. In Q1’12, the Company reclassified prospectively certain short-term debt obligations from Other Liabilities. †Principal only. Excludes capitalized leases and certain adjustments classified as long-term debt on the Company’s consolidated balance sheet. ††Beginning the first quarter of 2013, the Company reclassified prospectively Card Member credit balances from Card Member loans, Card Member receivables and Other liabilities to Customer deposits.
Forward Looking Statements

This presentation includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which are subject to risks and uncertainties. The forward-looking statements, which address the Company’s expected business and financial performance and which include management’s outlook for 2016-2017, among other matters, contain words such as “believe,” “expect,” “estimate,” “anticipate,” “intend,” “plan,” “aim,” “will,” “may,” “should,” “could,” “would,” “likely,” and similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. The Company undertakes no obligation to update or revise any forward-looking statements. Factors that could cause actual results to differ materially from these forward-looking statements, include, but are not limited to, the following:

- the Company’s ability to achieve earnings per common share (“EPS”) growth between $5.40 and $5.70 for 2016 and at least $5.60 for 2017, which will depend in part on the following: an acceleration of billed business and revenue growth, which could be impacted by, among other things, weakening economic conditions in the U.S. or internationally, a decline in consumer confidence impacting the willingness and ability of Card Members to sustain spending, a further decline in gas prices, a further strengthening of the U.S. dollar, a greater erosion of the average discount rate than expected, a greater impact on discount revenue from cash back, GNS volumes and cobrand partner and client incentive payments, and lower spending on new cards acquired than estimated; the Company’s success in addressing competitive pressures and implementing its strategies and business initiatives, including growing profitable spending from new and existing Card Members, increasing penetration among middle market and small business clients, expanding its international footprint, growing loyalty coalitions and increasing merchant acceptance; the timing and impact of the expected sale of the Costco U.S. Card Member loan portfolio; realizing incremental economics associated with the Costco U.S. contract extension, which could be impacted by, among other things, Card Member behavior, including the desire of Costco U.S. Card Members to continue to use their Costco U.S. cobrand cards and the availability to those Card Members of other payment forms; the impact of any potential restructuring charges or other contingencies, including, but not limited to, litigation-related expenses, impairments, the imposition of fines or civil money penalties, an increase in Card Member reimbursements and changes in reserves; credit performance remaining in line with current expectations; continued growth of Card Member loans held for investment; the ability to continue to realize benefits from restructuring actions and operating leverage at levels consistent with current expectations; the amount the Company spends on growth initiatives; changes in interest rates beyond current expectations; the impact of regulation and litigation, which could affect the profitability of the Company’s business activities, limit the Company’s ability to pursue business opportunities, require changes to business practices or alter the Company’s relationships with partners, merchants and Card Members; the Company’s tax rate being in the 34-35% range, which could be impacted by, among other things, the Company’s geographic mix of income being weighted more to higher tax jurisdictions than expected and unfavorable tax audits and other unanticipated tax items; the impact of accounting changes and reclassifications; and the Company’s ability to continue executing its share repurchase program;
Forward Looking Statements

- the actual amount to be spent on growth initiatives, including on marketing and promotion, technology development and commercial capabilities, as well as the timing of any such spending, which will be based in part on management’s assessment of competitive opportunities, overall business performance, the amount of any potential gain arising from a sale of the Costco U.S. Card Member loan portfolio management decides to spend on growth initiatives, contractual obligations with business partners, the ability of the Company to successfully update its systems and platforms, management’s ability to identify attractive investment opportunities and make such investments, which could be impacted by business, regulatory or legal complexities and the Company’s performance, and the Company’s ability to realize efficiencies, optimize investment spending and control expenses to fund such spending;

- the ability of the Company to reduce its overall cost base by $1 billion by the end of 2017, including reducing costs by streamlining the organization structure, reengineering key processes and leveraging policies and standards, and to realize the full benefit of the Company’s actions by the beginning of 2018, which will depend in part on the timing and financial impact of future reengineering plans (including whether the Company will recognize restructuring charges in future periods and the expected size of any such charges), which could be impacted by factors such as the Company’s inability to mitigate the operational and other risks posed by potential staff reductions, the Company’s inability to develop and implement technology resources to realize cost savings, underestimating hiring needs related to some of the job positions being eliminated and other employee needs not currently anticipated, lower than expected attrition rates and higher than expected redeployment rates; the ability of the Company to identify synergies and redundancies within its organizational structure, as well as reduce management layers; the ability of the Company to reduce annual operating expenses, which could be impacted by, among other things, the factors identified below; and the ability of the Company to optimize and lower marketing and promotion expenses, which could be impacted by higher advertising and mailing costs, competitive pressures that may require additional expenditures or limit the Company’s ability to reduce costs, contractual obligations with business partners, the availability of opportunities to invest at a higher level due to favorable business results and changes in macroeconomic conditions;

- the ability to reduce annual operating expenses by at least 3 percent in 2017 relative to the adjusted 2015 base, which could be impacted by increases in significant categories of operating expenses, such as consulting or professional fees, including as a result of increased litigation, compliance or regulatory-related costs, technology costs or fraud costs; the ability of the Company to develop, implement and achieve substantial benefits from reengineering plans; higher than expected employee levels; the impact of changes in foreign currency exchange rates on costs; the payment of civil money penalties, disgorgement, restitution, non-income tax assessments and litigation-related settlements; impairments of goodwill or other assets; management’s decision to increase or decrease spending in such areas as technology, business and product development and sales forces depending on overall business performance; greater than expected inflation or merit increases; the Company’s ability to balance expense control and investments in the business; the impact of accounting changes and reclassifications; and the level of M&A activity and related expenses;
Forward Looking Statements

• the Company’s lending write-off rates increasing more quickly than current expectations and provision expense being higher than current expectations, which will depend in part on changes in the level of loan balances, delinquency rates of Card Members, unemployment rates, the volume of bankruptcies and recoveries of previously written-off loans;

• the Company’s ability to execute against its lending strategy and grow Card Member loans held for investment, including by targeting new lending prospects and deepening relationships with current customers and developing new lending services, which may be affected by increasing competition, brand perceptions and reputation, the Company’s ability to manage risk in a growing Card Member loan portfolio, and the behavior of Card Members and their actual spending and borrowing patterns, which in turn may be driven by the Company’s ability to issue new and enhanced card products, offer attractive services and rewards programs, attract new Card Members, reduce Card Member attrition and capture a greater share of existing Card Members’ spending and borrowings;

• the ability of the Company to capture small business and middle market spending, which will depend in part on the willingness and ability of companies to use credit and charge cards for procurement and other business expenditures, perceived or actual difficulties and costs related to setting up card-based B2B payment platforms, the ability of the Company to offer attractive value propositions and card products to potential customers, the Company’s ability to enhance and expand its payment solutions, and the effectiveness of the Company’s marketing and promotion of its corporate payment solutions and small business card products to potential customers;

• uncertainties associated with the timing and impact of the expected sale of the Costco U.S. Card Member loan portfolio and the extension of the merchant acceptance agreement, such as operational issues related to the transfer of Card Member loans and accounts, the parties’ ability to satisfy the closing conditions and the amount of any gain recognized by the Company as a result of a sale, which could be impacted by the credit quality and performance of the portfolio, the amount of any volume decline experienced by the cobrand portfolio and the timing of the potential sale as the gain will be determined by the amount of the aggregate outstanding loans transferred at closing;

• the possibility that the Company will not execute on its plans to significantly increase merchant coverage and achieve parity coverage with other card networks in the U.S. by 2019, which will depend in part on the success of OptBlue merchant acquirers in signing merchants to accept American Express, which could be impacted by the pricing set by the merchant acquirers, the value proposition offered to small merchants and the efforts of OptBlue merchant acquirers to sign merchants to accept American Express, as well as the willingness of Card Members to use American Express cards at small merchants and of those merchants to accept American Express cards;
Forward Looking Statements

- the erosion of the average discount rate by a greater amount than anticipated during 2016, 2017 and beyond, including as a result of changes in the mix of spending by location and industry, merchant incentives and concessions, volume-related pricing discounts, strategic investments, certain pricing initiatives, competition, pricing regulation (including regulation of competitors’ interchange rates) and other factors;

- the ability of the Company to execute its strategy with respect to Loyalty Coalitions, which will depend in part on the Company’s success in continuing to attract new customers and partners, including by expanding into new countries, improving the value to merchants and collectors and innovating new features that are attractive to merchants and collectors;

- the Company’s ability to attract and retain Card Members, which will be impacted in part by competition, brand perceptions and reputation and the ability of the Company to develop and market value propositions that appeal to Card Members and new customers and offer attractive services and rewards programs, which will depend in part on ongoing investment in marketing and promotion expenses, new product innovation and development, acquisition efforts and enrollment processes, including through digital channels, and infrastructure to update systems and platforms to support new products, services and benefits;

- changes in the Company’s share of Card Member spending and borrowings, which will depend on the behavior of the Company’s Card Members and their actual spending patterns, which may be driven in part by the Company’s ability to issue new and enhanced card products, expand merchant acceptance, enhance functionality and offer attractive services and rewards programs, including effectively deploying offers in digital and other channels;

- the ability of the Company to maintain and expand its presence in the digital payments space, including online and mobile channels, and increase digital acquisition and engagement, which will depend on the Company’s success in evolving its business models and processes for the digital environment, offering attractive value propositions to new Card Members to incentivize the use of and enhance satisfaction with the Company’s digital channels, building partnerships and executing programs with other companies, investing in additional functionality and utilizing digital capabilities that can be leveraged for future growth;

- the ability of the Company to grow in international markets, including increasing merchant coverage and leveraging our product suite and digital capabilities in countries outside the United States, which could be impacted by business practices that favor local competitors or prohibit or limit foreign ownership of certain businesses; the Company’s ability to partner with additional GNS issuers and the success of GNS partners in acquiring Card Members and/or merchants; political or economic instability, which could affect lending and other commercial activities, among other businesses; the Company’s ability to tailor products and services to make them attractive to local customers; the success of OptBlue merchant acquirers, One Point agents and other acquiring partners in signing merchants to accept American Express, which could be impacted by the value proposition offered to merchants and the relevance of American Express in the local market; and competitors with more scale and experience and more established relationships with relevant customers, regulators and industry participants;
Forward Looking Statements

•uncertainty relating to the ultimate outcome of the antitrust lawsuit filed against the Company by the U.S. Department of Justice and certain state attorneys general, including the success or failure of our appeal and the impact on existing private merchant cases and potentially additional litigation and/or arbitrations;

•changes affecting the ability or desire of the Company to return capital to shareholders through dividends and share repurchases, including the opportunity for incremental capital returns related to the Costco U.S. portfolio sale, which will depend on factors such as approval of the Company’s capital plans by its primary regulators, the amount the Company spends on acquisitions and the Company’s results of operations and capital needs in any given period;

•the possibility the actual amount the Company’s new Card Members spend during their first full year as Card Members will be lower than estimated, which will depend in part on factors such as changes in the economic and business environment, the Company’s ability to successfully identify higher spending Card Members, the effectiveness of the Company’s marketing and loyalty programs to continue to engage Card Members and the willingness of Card Members to sustain their spending at current levels;

•legal and regulatory developments wherever we do business, including with regard to broad payment system regulatory regimes, such as in Europe and Australia, consumer financial product protection actions by the CFPB and other regulators and the stricter regulation of large, interconnected financial institutions, which could make fundamental changes to many of our business practices or materially affect our capital or liquidity requirements, results of operations, or ability to pay dividends or repurchase our stock; and

•factors beyond the Company’s control such as changes in global economic and business conditions, including consumer and business spending, the availability and cost of credit, unemployment and political conditions, foreign currency rates, fire, power loss, disruptions in telecommunications, severe weather conditions, natural disasters, health pandemics, terrorism, cyber attacks or fraud, which could significantly affect spending on American Express cards, delinquency rates, loan balances and travel-related spending or disrupt the Company’s global network systems and ability to process transactions.

A further description of these uncertainties and other risks can be found in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015 and the Company’s other reports filed with the Securities and Exchange Commission.
